

See below the latest ways in which SGC Group are using years of industry experience to help customers to improve their facilities by offering new and creative solutions alongside the fantastic service and great products that their customers have come to expect.

IMPROVE YOUR PITCH & GENERATE EXTRA REVENUE

RapidTurf Synthetic
Sports Solutions
www.rapidturf.co.uk

Rapid Turf Synthetic has launched 3G Synthetic Assistant Referee Runs for Football Stadiums with fabulous benefits for Groundsmen.

The Assistant Referee Runs along the pitch are expensive and time consuming to maintain and often unsightly during winter months and poor weather.

RTS have installed a revolutionary solution at Boundary Park of 3G Synthetic Assistant Referee Runs that earn revenue for the club and improves the stadium facilities.

Synthetic Turf Advertising

The revenue earned comes from incorporating an advertising strip one metre from the playing surface using lettering and logos that fit into the remaining surface area.

Key logo and advertiser messages can be positioned along the length of the surface for maximum television exposure driving up the value to the advertiser and driving up the revenue to the club.

The time saving factors will save money for the club and Assistant Referees have been positive about the installation, commenting that the surface is, "Extremely comfortable, no slipping and good for stopping"

Turnkey operation

RTS will lead the project from initial site survey, through our in house graphic design service and carpet logo manufacture, to the installation of our product and supply of a suitable maintenance program.

Alan Hardy, Oldham Athletic Chief Executive, "I am very pleased with the installation of the Assistant Referee runs at Boundary Park. Rapid Turf staff worked hard to make sure the project was a great success."

Lee Williams, Oldham Athletic Head Groundsman, "The installation by RTS is of the highest quality, it was a pleasure to work alongside their tidy and conscientious team. The levels are perfectly matched to the playing surface and this is a great addition to our pitch that will save my team many hours of maintenance."

Guy Walker, Oldham Athletic Sales & Marketing Manager, "Inserting RTS Synthetic Turf Advertising to our Assistant Referee Runs allows us to generate more space for sponsorship and advertising."

IT'S TIME TO... BIG ROLL

WITH RAPID TURF.....THE BIG ROLL TURF COMPANY

RapidTurf
Supply - Preparation - Installation
www.rapidturf.co.uk

"Rapid Turf's service is excellent, the big rolls took very little time to become established and the new tee's look fantastic."
Lee Cox, Course Manager, Mill Hill Golf Club

Rapid Turf has established a fine reputation for installing turf roll of ALL sizes, quickly and to the highest standards, working along the way at some of the UK's most prestigious sporting arenas.

Rapid Turf can efficiently prepare any size area of ground, including stone and power raking, stone burying, power harrowing and laser grading before installing your turf to a truly superior finish.

Our state of the art big roll turf installation equipment has been imported from the USA and is unique to this country. This allows us to install big roll turf up to 1.2m wide and 40m long.

Benefits of Rapid Turf big roll include:

- Fewer seams for quicker establishment
- Superior finish compared to small roll
- Suitability for all sports surfaces and landscaped areas of ANY size

Rapid Turf are extremely professional, conscientious and the quality of service and finish achieved by their team is of the highest standard. I would recommend them to anyone.

Craig Gilholm, Course Manager, Royal Liverpool Golf Club

See our online video demos for more details

Working in partnership with the UK's finest TGA Accredited turf farms, any choice of turf grade can be selected to match your surface requirements and budget, including:

- Fibre Reinforced** for professional playing surfaces
- Thick Cut** up to 50mm for an immediate playing surface
- Washed Turf** to marry seamlessly to your specific rootzone
- RTF** for those difficult to grow areas

KORO TOP DRAIN

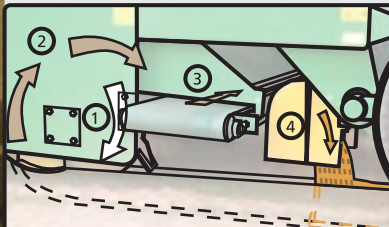

SGCGroup
ANY SPORT - ANY SURFACE
CONSTRUCTION - MAINTENANCE

THE ULTIMATE SURFACE DRAINAGE SYSTEM

How it works

1. The blades rotate, to excavate the trench
2. Spoil is cleanly removed via the guide channel
3. Conveyor moves spoil off into trailer
4. Sand is injected into trench, before being firmed by the rear wheels

The Koro Top Drain is a fantastic development in surface drainage technology which is perfect for use on all natural sports surfaces. The Top Drain rapidly excavates three surface drainage trenches simultaneously, 40mm wide by 200mm deep at 500mm spacings. Sand is propelled into the trenches to ensure that there is no settlement and the rear tyres firm the sand to create a consistent playing surface.

The surface is then drag-matted to a level finish. The trenches will heal rapidly creating a much healthier surface which encourages strong grass rooting within a balanced soil that retains nutrients and water.

See our online video demos for more details

"The Top Drain work that SGCGroup carried out is having fantastic results and we see our partnership with SGC as key to the future development of the sports pitches in Tameside."

Paul Eccles, Tameside Metropolitan Borough Council

Additional Sports Pitch Services

- End of season maintenance including:
 - Koro Field Top Maker, Verti Draining, Overseeding
- Full pitch construction and renovation:
 - Primary and secondary drainage system installation
